FROM CHAOS TO CONFIDENCE

The operating system for student services and safety.

Impact Suite gives K–12 districts one platform for safety, mental health, special education, Medicaid, compliance and family communication, with AI that handles the paperwork so educators can spend their time on students.

WHO WE ARE

Impact Suite provides safety, mental health, well-being, and student support solutions to schools and districts nationwide. Built on years of experience serving school communities, our K–12 platform equips educators with tools to keep students safe, supported, and positioned to succeed.

Why districts choose Impact Suite

One platform, one student record

Safety, mental health, special education, Medicaid, attendance, compliance and family communication share one record. Nothing is entered twice, and every team sees the whole student.

AI that does the paperwork

AskImpact answers plain-language questions within each user's role. AI drafts concern forms, threat assessments and intervention plans, and reads an existing IEP into a working record.

Built for trust

A FERPA, HIPAA and COPPA compliance program on U.S.-hosted AWS, with no AI training on student data. SOC 2 is in progress, and security documentation is public at trust.impactsuite.com.

FERPA · HIPAA
Plus COPPA, on U.S.-hosted AWS

Per-student pricing
License only the bundles you need. No per-user fees.

ClassLink Certified
Rostering and single sign-on built in

AI included
The AskImpact assistant comes with every license

Everything a district runs for its students, in one place

License the bundles you need, priced per student with no per-user fees. Every bundle shares one student record.

Safety & threat assessment
Concerns and cases, CSTAG, NTAC and Salem-Keizer threat assessment, safety alerts and an anonymous tip line.

Mental health & wellness
Screeners and wellness check-ins, SEL kits, a student wellness app and the Raise parent app.

MTSS & student supports
Tiered interventions, 504 plans, PBIS, and plans for reading, math, behavior, English learners and more.

Special education
IEPs from referral to progress reports, with e-signatures and AI that reads existing IEPs.

Medicaid
Fee-for-service and time-study claiming, with checks on every claim line and an audit-readiness score.

Attendance
SIS attendance, automatic absence texts to families and compulsory education letters.

Reports & early warning
District and school dashboards, GPA and attendance analytics, and an early-warning risk ranking.

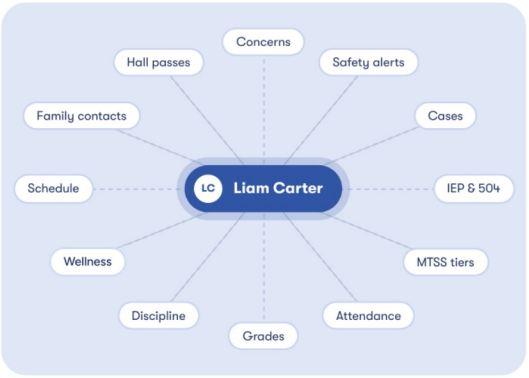

Policy management
Policies with AI compliance recommendations, staff acknowledgments and legislative monitoring.

Staff training
State-required trainings, assignments, certificates and professional development.

Family & student communication
Parent and student portals, email and text broadcasts, announcements and secure messaging.

Hall pass & emergency
A digital hall pass, plus emergency response through our partner Emergent3.

AskImpact AI assistant
Plain-language answers within each user's role, plus AI-drafted forms, plans and tasks.

Every module feeds one student profile, so counselors, administrators and special education teams work from the same picture.

A strong fit when a district:

- Runs separate tools for safety, mental health, special education and compliance
- Has to meet state requirements for threat assessment, staff training or policy, and prove it
- Is replacing an aging IEP or student services system
- Wants cleaner Medicaid documentation behind every claim
- Wants AI it can trust: role-checked, U.S.-hosted and never trained on student data

Typical buyers: superintendents, student services and special education directors, safety and security leads, counselors, and HR and compliance teams.

> Impact Suite is a game-changer for schools—finally, one platform that makes compliance tracking simple.
