AI-POWERED · SAFETY & BEHAVIOR

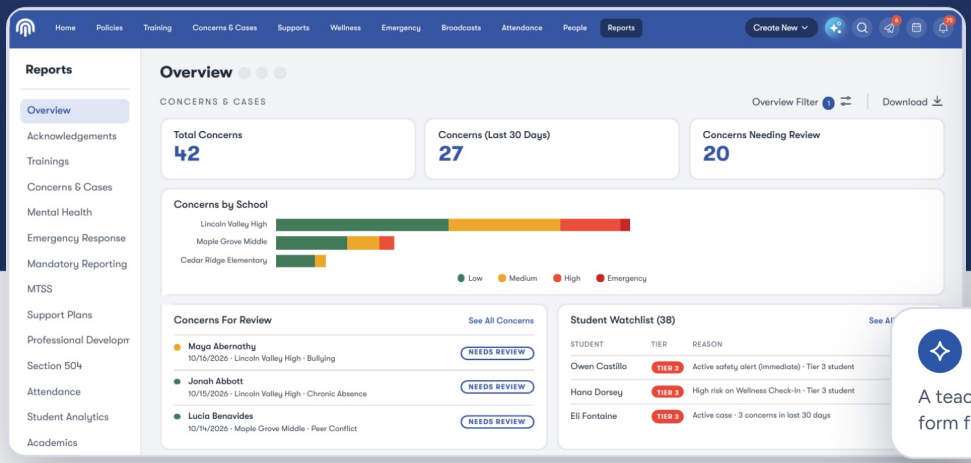

See the warning signs. Respond as one team.

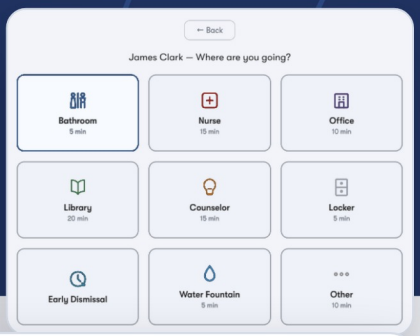

INCLUDED AT NO EXTRA COST

Digital hall pass

Live pass dashboard, lockdown integration and kiosk mode.

Concerns, behavior, screeners and tips land on one student record, so the pattern is visible to the people trained to act, and every step of the response is documented.

Concern drafted from a description

A teacher described it, typed or spoken. AI filled in the form for review.

Every signal lands on one student.

Staff notice small things. Impact Suite puts them side by side, then moves the team from alert to plan.

SIGNALS IN

- **Concerns** — AI-assisted forms, voice to text
- **Discipline** — Incidents, actions, restraint & seclusion log
- **Mental health screeners** — PHQ-A, GAD-7, ASQ, C-SSRS
- **Anonymous tips** — SafeTip tip line with SMS intake
- **Bullying & harassment** — Reports documented and tracked

One student record

The pattern no single staff member would see

TEAM RESPONSE

1 · ALERT
Safety alerts on the NTAC framework

2 · CASE
Threat assessment in your framework

3 · PLAN
Safety & intervention plans, monitored and adjusted

- **Suicide risk assessment** on ASQ and C-SSRS protocols, with a crisis alert workflow for counselors
- **Outcome rules** that trigger action at thresholds your district defines
- **Mandatory reporting monitoring** that guides staff through every required step

WHAT WE HEAR FROM SAFETY LEADERS

A student's threat assessments, screenings and referrals live in different places, so no one sees the full picture until it's too late.

Impact Suite brings them together on one student record.

THREAT ASSESSMENT

Use a proven framework, or build your own.

Seven research-based frameworks run natively, from screening through safety and intervention plans, case monitoring, plan adjustment and community resource referrals.

CSTAG · NTAC · Salem-Keizer · BCS/NTAC · CTAMP · PCCD · ALBTAM

Build your own protocol

Design your district's own threat assessment or protocol forms and steps, and run them on the same case record, with the same team workflow and documentation as the built-in frameworks.

INCLUDED IN SAFETY & BEHAVIOR

Digital hall pass

Know where every student is, without a paper pass in sight. No extra add-on to buy.

Live dashboard
Every active pass, with timers that flag overdue students

Lockdown ready
Lockdown integration, plus kiosk mode for shared check-in points

Accommodations
504 and IEP pass-time accommodations applied automatically

Keep-apart rules
Keep specific students apart and flag pass misuse

Upgrade options

Add when your district is ready.

UPGRADE

+ Comprehensive Alerts

See the whole child: safety alerts that weigh academics and attendance alongside behavior. AI flags the pattern; your team reviews and decides.

- Attendance, grade and discipline feeds cross-referenced into safety alerts
- AI pattern detection across academic and behavior data
- Enhanced early-warning triggers when multiple risk signals converge

ADD-ON Through our partner Emergent3

Emergency Response (E3)

Physical emergency response, connected to the same platform your staff already use.

- First-responder alerts in under six seconds
- Smart maps and first-responder integration
- Alyssa's Law-compliant panic alerts

See Safety & Behavior in action.

We'll walk your safety, counseling and threat assessment teams through it live. Available through SHI.
